Purpose

The PPP Foundation training will assist those who wish to use PPPs to develop and implement projects with the basic skills to understand and prepare a PPP Project.

The Programme

The programme is divided in two parts. The first seeks to impart basic skills of PPPs and serve as an introduction to even those who are not well versed in the subject.

The second part focuses on the more practical aspects of PPPs, in particular the development and structuring of projects that could be dealt with as PPPs. This part seeks to apply the skills and knowledge gained in the first part to real life problems being experienced in the DFIs.
