The role of Development Finance

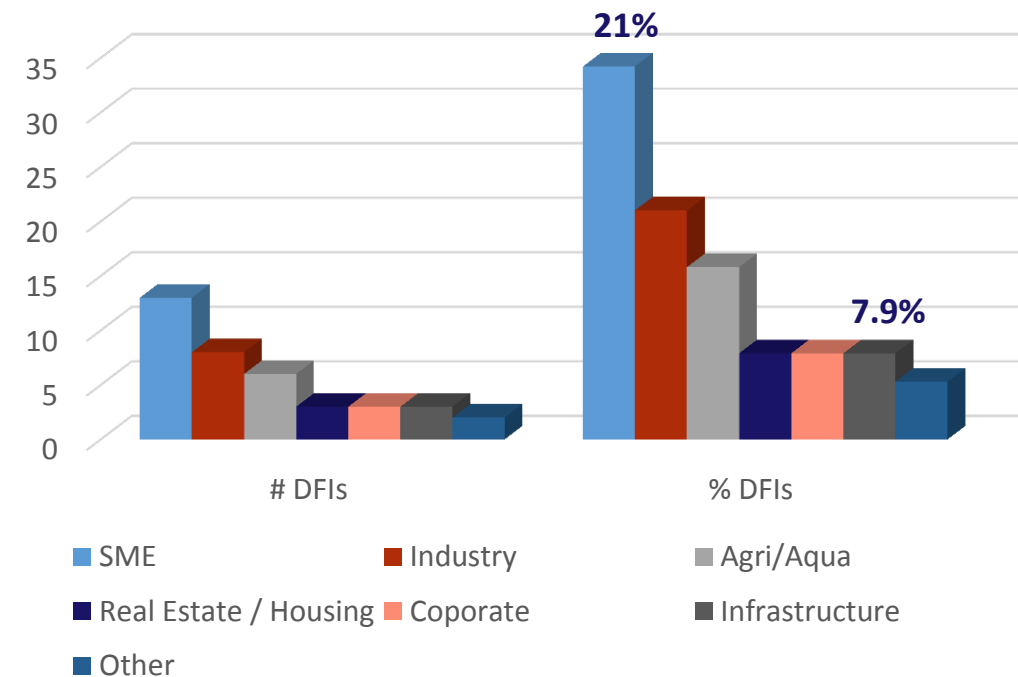

Development Finance has traditionally been viewed as being sourced primarily from the public sector, through governments and Development Finance Institutions.

However, the expanded SDG Agenda 2030 **traditional sources of funding will not finance the goals**, given the estimations of **\$11.5 trillion p.a.** required over 15 years = **\$ 172.5 trillion in total.**

SADC DFI network SDG themes

Each DFI CEO received a letter and pledge template to complete. This template would help identify an SDG theme for the network. It would also establish a baseline for reporting on SDGs individually.

Results:

SADC DFI Network's overall theme (so far):

SDG 8 – Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all

SDG 9 – Build resilient infrastructure, promote inclusive and sustainable industrialization, and foster innovation

Other subordinated themes identified:

SDG 7 – Ensure access to affordable, reliable, sustainable and modern energy for all

SDG 13 – Take urgent action to combat climate change and its impacts

DFIs that submitted pledges: 4 / 35

The Development Bank of Zambia (DBZ)
The Development Bank of Southern Africa (DBSA)
The Swaziland Development Finance Corporation (Fincorp)

The Infrastructure Development Bank of Zimbabwe (IDBZ)
The Land and Agricultural Bank (Landbank)

What can we do?

1 Align your strategy towards financing projects for goals aligned with mandate / national development plan

3 Incorporate development impact reporting in deal process.

5 Report on deals finalized on projects that contribute towards a goal / target to member state and network

2 Identify projects that can help achieve a goal / target.

4 Crowd in private sector or international DFI funding at various stages of the project. Create new funding models

Next steps

1. Outstanding pledges to be submitted to the SADC DFRC
2. Monitoring and evaluation process to be discussed
including (not exhaustive):
 - Getting external help to develop reporting framework
 - Key factors to be included in terms of reference for reporting framework
 - Financial implications
 - Levels of sophistication of tool used
